**Policy Subject:** Family Planning Clinic Code Changes

**Affected Programs:** Medicaid

**Distribution:** Family Planning Clinic Providers

**Policy Summary:** The bulletin provides information regarding the conversion of the local codes to national codes. The Health Insurance Portability and Accountability Act (HIPAA) requires DCH to eliminate the use of all local procedure codes. DCH researched the national codes and, where possible, cross-walked the local codes, utilized for Family Planning Clinic (FPCs), to national codes. There are no national codes available for many of the pharmaceuticals currently being distributed by the FPCs and billed to Medicaid. Without a national code for these products, the FPCs have no mechanism to bill. The Medicaid beneficiaries may still receive these medications through a prescription from a pharmacy.

This policy will be adding coverage for injection administration, procedure code 90782 for use by FPC providers.

# Proposed Policy Draft

Michigan Department of Community Health  
Medical Services Administration

**Distribution:** Family Planning Clinics 03 – XX

**Issued:** xx-xx-03

**Subject:** 2003 Procedure Code Updates

**Effective:** xx-xx-03

**Programs Affected:** Medicaid, Children's Special Health Care Services

This bulletin is to notify you of the HCPCS (Healthcare Common Procedure Coding System) procedure code changes for 2003 that will be implemented by the Department of Community Health (DCH) for dates of service on and after October 1, 2003.

The Health Insurance Portability and Accountability Act (HIPAA) requires DCH to eliminate the use of all local procedure codes. DCH researched the national codes and, where possible, cross walked the local codes, utilized for Family Planning Clinics (FPCs), to national codes. Unfortunately, there are no national codes available for many of the pharmaceuticals currently being distributed by the FPCs and billed to Medicaid. Without a national code for these products, the FPCs have no mechanism to bill Medicaid for reimbursement. Therefore, effective October 1, 2003, the beneficiary will need to obtain these pharmaceuticals by prescription from a Medicaid-enrolled pharmacy.

Listed in the attachment are the HCPCS procedure codes that may be billed by FPCs effective October 1, 2003. Refer to your 2003 CPT and HCPCS codebooks for the full description of the new codes, as well as a full list of deleted codes, added codes, and code description.

DCH has added coverage for the injection administration procedure code 90782 for FPC providers effective for dates of service on and after October 1, 2003.

The following local codes will no longer be available for FPCs to use for billing and will be end dated September 30, 2003: Z8003-Z8006, Z8050-Z8076, Z8080-Z8082, Z8090-Z8092, Z8505, and Z8506.

## Manual Maintenance

Replace the current Family Planning Clinics Procedure Code Appendix with the attached revised Procedure Code Appendix. You may discard this bulletin when manual maintenance is completed.
